DETAILED ACTION

1. Applicant's filing amendment dated Aug. 13, 2008, responds to the Office action mailed Jan. 14, 2008 provided in the rejection of claims 1-12, 14-16, 18 and 21-24.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Jeffrey Schubert (Reg. No. 43,098) on 9/23/2008 to place the claims in the condition for allowance.

3. The application has been amended as following:

- As to Claim 9, amended as following
- A system to test a code segment of a source file, comprising: an interface to select the code segment based upon input from a user, the code segment being self-contained; a file creator to machine-render a source code skeleton to create a temporary source file in response to a-selection of the code segment via the interface, the file creator to machine-render the source code skeleton with additional code, the file creator to choose the additional code based upon the code segment to supplement the code segment for compilation; a code gatherer to verify whether the code segment has an entry point to determine that the code segment does not have an entry point, insert the entry point into

Art Unit: 2191

the source code skeleton in response to determining that the code segment does not have the entry point, and copy the code segment into the source code skeleton to generate a temporary source file; a code generator to insert a monitoring statement, the monitoring statement to provide runtime data associated with the code segment; an adaptive compiler to compile the temporary source file into a compiled program to generate a result based upon the monitoring statement; a processor to execute the compiled program; and an output device to communicate the result.

Allowable Subject Matter

4. Claims 1-12, 14-16, 18 and 21-24 are allowed.

5. The following is an examiner's statement of reasons for allowance:

As pointed out by applicant, the prior art of record fails to teach and/or suggest

A method to test a code segment of a source file, comprising: selecting the code segment from the source file for testing based upon input from a user, the code segment being self-contained; machine-rendering a source code skeleton in response selecting the code segment, wherein machine-rendering comprises choosing additional code to include in the source code skeleton to supplement the code segment for compilation; verifying whether the code segment has an entry point to determine that the code segment does not have an entry point; inserting the entry point into the source code skeleton in response to determining that the code segment does not have the entry point; incorporating the code segment into the source code skeleton to generate a temporary source file; inserting a monitoring statement into the temporary source file, the monitoring statement to provide runtime data associated with the code segment; and compiling

Art Unit: 2191

the temporary source file into a compiled program; and executing the compiled program to output a result based upon the monitoring statement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
